					Total of Jews in the entire World .	

» In the course of 1933, the number of Jews in Palestine rose to 280 000.

** Including some 4000 Jews at Aden.

[3] In 1931 there were in the French part of Morocco 107,603 native Jews to which an estimated number of 12,000 foreign Jews is added.

[5] In 1921 there were in Algiers 73,967 Jews, not counting foreign Jews and Jews inhabiting the oasis of Mzab.

[7] In 1931 the number of native Jews in Tunis amounted to 56,248, to which some 10,000 foreign Jews have to be added.

Note.—An * signifies that the number is not obtained from a census, but merely by an estimate. These estimates are formed on the basis of the *American Jewish Year Book* (Philadelphia, 1932), the *Statesman's Year Boole* (London, 1932), and *Die vitternationalen, tib&rsichfen im Statist. JahrbueA des Deutschen Reiche** (Berlin, 1932). The estimate for the Jews in Italy is based on a study by Professor Rudoli . Bach in 'Eome for 1931; the estimates for Iraqi and Syria, on the author's own investigations.
